

Zsanett Tamás

Frontend-Focused Software Developer | UI/UX | Project Management | Team Leadership

Budapest, Hungary | zsanett.tamas87@gmail.com | zsena.github.io | GitHub | LinkedIn

English: B2 | Hungarian: Native

01 / PROFILE

Frontend-focused software developer with approximately 8 years of experience building and maintaining production web applications. Strong in HTML, React, JS, Tailwind, UI/UX and translating business requirements into clear, usable interfaces. Experienced in end-to-end project ownership, client and stakeholder communication, prioritization, team coordination and delivery. Expanded into backend engineering through university studies and commercial work with Go and .NET, Python.

02 / CORE STRENGTHS

Frontend Engineering React, TypeScript/JavaScript, responsive UI, component architecture	UI/UX Figma, wireframes, interface design, usability-focused product thinking	Project Ownership Discovery, requirements, planning, prioritization and end-to-end delivery
Team Leadership Coordination, decision-making, mentoring and delivery responsibility	Full-Stack Collaboration Frontend-first development with Go, C#.NET and REST APIs	Agile Delivery Jira, Confluence, Git workflows, Scrum/Kanban and stakeholder communication

03 / PROFESSIONAL EXPERIENCE

Managing Director & Software Developer **ArchiTech Innovations Kft.** May 2024 - Present

Software development, project delivery and team coordination - geekrabbits

- Lead multiple software projects from discovery and planning through delivery: clarify requirements, prioritize work, coordinate implementation and communicate with clients and stakeholders.
- Build frontend-heavy applications with React and TypeScript while contributing to Go and .NET backend/API work.
- Coordinate developers and project work, make implementation decisions, review progress and take responsibility for successful end-to-end delivery across multiple projects.
- Create wireframes, interface concepts and UX improvements in Figma; combine instructor-led UX training with years of self-directed practice.
- Use Jira, Confluence, GitHub/GitLab and Agile workflows to keep product, technical and delivery work aligned.

Selected current projects

RDO - Service Management Platform Commercial service-management product where I contribute frontend functionality, product workflows and full-stack collaboration for day-to-day operational use.	React + Go	rdo-app.com
Mimosa - Language Learning Platform Video-based language-learning product with subtitle-driven practice; I contribute frontend implementation, UX/product thinking and application development.	React + Go	mimosa.ux-studio.com
DDS Commercial web application where I contribute frontend implementation, feature delivery and ongoing full-stack product development.	React + Go	

Frontend Developer - **Meska.hu** 3+ years

Large production marketplace platform

- Developed and maintained user-facing functionality for a live marketplace platform with a strong focus on frontend quality, responsive interfaces and production stability.
- Worked with React, JavaScript, HTML5, CSS3, Tailwind CSS and Alpine.js while collaborating with PHP/MySQL and Go-based parts of the platform.
- Delivered UI improvements, new product features and production fixes within an established codebase and real customer environment.
- Used Git/GitLab and collaborated continuously with product and development stakeholders.

04 / EARLIER EXPERIENCE

Frontend Developer -	CodeVision Ltd.	2019 - 2020
- Built and maintained client-facing web interfaces, strengthening responsive frontend delivery, JavaScript/CSS implementation and production problem solving.		
Junior Web Developer -	Rufftech Ltd.	2018 - 2019
- Developed production websites and reusable responsive UI in JavaScript/CSS and the PHP/Symfony ecosystem.		
Trainee / Internship Web Developer -	Vatel Ltd. & Timbrook Consulting Ltd.	2017 - 2018
- Early commercial web-development experience focused on HTML, CSS, JavaScript, Bootstrap, WordPress and hands-on delivery in team environments.		

05 / SELECTED ADDITIONAL PROJECT EXPERIENCE

I-DEST	Blazor / .NET 8, Typescript, Angular, Figma
Admin and website development in .NET 8 / Blazor, including reusable UI and application features.	
Nexus Website	Blazor + Umbraco Delivery API
Frontend implementation and CMS integration using Blazor and Umbraco Delivery API.	
Autovignet	PHP / Yii2 + Docker
Worked on a containerized PHP/Yii2 application and its development environment.	
Frontend & website portfolio	React / Vue / Nuxt / CMS
Delivered multiple responsive company websites, admin interfaces and product-facing UIs across commercial client work.	

06 / TECHNICAL TOOLKIT

Frontend React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vue, Nuxt, Alpine.js, Blazor	Backend Go, C#, .NET / .NET Core, PHP, REST APIs, MySQL
UI / UX Figma, wireframing, interface design, responsive design, usability thinking, design systems	Project & collaboration Project management, requirements, prioritization, team coordination, client/stakeholder communication
Tools & process Jira, Confluence, Git, GitHub, GitLab, Docker, Postman, Agile, Scrum, Kanban	CMS / platforms Umbraco, WordPress, production marketplace and content-driven web platforms

07 / EDUCATION & PROFESSIONAL DEVELOPMENT

BSc in Computer Science Engineering -	University of Dunaújváros	2023 - Present
Final semester		
- University studies strengthened backend development, software engineering, databases, algorithms and computer-science foundations alongside existing professional frontend experience.		
- Plan to continue studies at MSc level after completing the BSc.		
Web Design & UX training -	PROOKTATÁS + private UX instruction	2017
- Instructor-led web design and UX training complemented by continued self-directed study and practical UI/UX work in commercial projects.		
Additional learning: Udemy and edX.
